# PRICE LIST

DOKUMEDIK PRIVATE CLINICAL ADMINISTRATION SYSTEM

## SOFTWARE PACKAGE PRICES

The Dokumedik Private Clinical Administration System is a multi-user, networked IT system. Accordingly, prices can be calculated based on a rental structure that depends on the number of workstations

**Prices are without VAT.**

## SOFTWARE RENTAL PRICE DEPENDS ON THE NUMBER OF WORKSTATIONS

From December 2021, the terms of access to the Dokumedik software will change. Our web-based software under development requires a design based on other principles. The option to purchase a workstation number-based license will be phased out, and a rental design based on a workstation number will be introduced instead.

The main features of the rental construction:
- in all cases, we enter into an indefinite-term contract for the use of the software.
- the contract can be terminated at any time with 30 days notice
- the right to use the software is valid only during the term of the contract
- non-payment of the rent will result in the termination of the contract
- the rent includes:
    - training one person when concluding a contract
    - compliance with the law,
    - the availability of newer versions of the software
    - bug fixes
    - daily support
- what is not included in the rent:
    - Carrying out the parameterization required for start-up (loading data), migration
    - additional training

**Workstation:** A computer or remote access interface connected to a clinical database. If a one user uses the system in both methods, it is considered as one workstation. If the software package works at multiple sites, connected to separate databases, workstation licenses must be purchased per site (per database). Workstations that are strictly CallCenter-only are free. The CallCenter user can only use the Appointment program, cannot print lists, and cannot see the patient's clinical or account history.

## BASIC PACKAGE PRICE

| Price | |
|---|---|
| Basic package price | **10.000,-Ft+VAT /** workstation |

**In the case of a number of workstations exceeding 20, the rental fee may be based on an individual agreement.**

## CONTENTS OF THE BASIC PACKAGE

- Scheduling program
- Clinical program
- Laboratory program
- Imaging program
- Partner contract program
- System parameterization program
- Invoicing program (Online invoicing integration (Szamlazz.HU and/or Billingó))
- Inquiry of EESZT history
- EESZT data provider program (posting in the background, after the doctor has logged in)
- Service performing scheduled tasks in a database
- Unlimited number of users
- Unlimited number of patients
- MNB exchange rate download service

## OPTIONAL PLUS SERVICES

| Fees depend on the number of workstations | |
|---|---|
| Nil Nocere eRecipe filling program | **3.000,-HUF+VAT** / month/workstation |
| **Fixed monthly fees** | |
| EESZT data service with technical user | **5.000,-HUF+VAT**/month |
| Email sending integration (SendinBlue and/or SMTP) | **5.000,-HUF+VAT**/month |
| SMS sending integration (Vodafone bulk and/or SeeMe) | **5.000,-HUF+VAT**/month |
| Sending PACS and downloading findings (ERAD or DIVAS) | **5.000,-HUF+VAT**/month |
| HL7 external lab integration (Synlab, Corden) | **5.000,-HUF+VAT**/month |
| NeumannLabs lab integration | **5.000,-HUF+VAT**/month |
| DrPort integration (EP card online payment) | **5.000,-HUF+VAT**/month |
| GoodId Scanner integration (reading patient data from a document) | **5.000,-HUF+VAT**/month |
| Calling system integration (Multimex QFusion) | **5.000,-HUF+VAT**/month |
| SignoWise integration (electronic signature of documents, e.g. medical record) | **5.000,-HUF+VAT**/month |
| API for online scheduling (connection with online scheduling systems, e.g. Medicall, Teladoc, FoglaljOrvost.hu, EA, DoktorDoktor.hu, etc.) | **5.000,-HUF+VAT**/month |
| API Patient portal (connection to online patient portal systems) | **5.000,-HUF+VAT**/month |
| Sending invoices to the accounting system (file exchange, partner.csv and szamla.csv) - adapted to the partner's accounting system | **5.000,-HUF+VAT**/month |
| API Premium (highlighted online systems Dokumedik connection) | **30.000,-HUF+VAT**/month |

## OCCASIONAL MAINTENANCE

If personal assistance is required at the partner's premises, the departure fee is as follows:

| In case of on-site arrival | |
|---|---|
| On-site arrival fee - Budapest | 20.000,-HUF+VAT/occasion |
| On-site arrival fee - outside Budapest | 40.000,-HUF+VAT / occasion |
| Each started hour at the on-site arrival | 15.000,-HUF+VAT /hour |

## TRAINING

Should the initial training of one person undertaken in the rental construction prove to be insufficient, it is possible to organize further training in an extended circle. The cost of the training includes a delivery fee.

| Daily fee | |
|---|---|
| Daily fee (for groups of 3-5 people, max. 4 hours) - Budapest | 50.000,-HUF+VAT |
| Daily fee (for groups of 3-5 people, max. 4 hours) – outside Budapest | 70.000,-HUF+VAT |

## SOFTWARE DEVELOPMENT BASED ON INDIV IDUAL NEEDS

The Dokumedik Private Clinical Administration System is under continuous development based on the ideas and wishes of developers, consultants and existing users. Of course, there may be a unique need that does not fit into development plans. In such a case, based on an individual agreement, we will make the requested changes within short deadlines, reserving the right to make the resulting changes available to other users.

| Development fee | |
|---|---|
| Engineering development hourly fee | 20.000,-HUF+VAT /hour |

## REQUIREMENTS FOR THE OPERATION OF THE SOFTWARE PACKAGE

The Dokumedik Private Clinical Administration System is a client / server software package. This means that the data is stored by a central server software that is not part of our application.

To operate, the user must have one of the following system software:

- Microsoft SQL Server Express Edition is suitable for 1-2 workstations. It can also be installed under a non-server type Windows operating system (Win7, Win8, Win10, Win11).
- Microsoft SQL Server Standard Edition. If the workstation number is large (5-10), then it is an absolute necessity.

User programs require computers wich run Windows. The minimum Windows operating system requirement is the Windows 7 version.
